THURSDAY, DECEMBER 21, 1893.

Mr. CLIVEAND is again being accused of not being a true Democrat.

One thing at least is settled, the present Administration will not annex itself to its predecessor. It goes by contraries.

The Owensboro Messenger declares the fact that out of about 2,500 fourth-class post offices in Kentucky, only 1,042 are filled by Democrats.

The Hawaiian Provisional Government is a thorn in the side of the present administration, and it bothered what to do about it.

In several counties in the state, candidates for the county offices are out and hustling, many of them confident, no doubt, that "Tis the early bird that gets the worm" applies to office-seeking.

One of the New York churches has decided to forego elaborate Christmas decorations this year and devote the money to the help of the poor. This should apply to private gratification as well as to public society expenditures.

It would not surprise the majority of the people in this country if a full Republican County ticket is elected next November. All that's required is a concerted action on the part of the Republicans and a putting forth the best men for the offices to be filled. A more favorable opportunity has never presented itself. The old time Democratic majorities in Hopkins County are things of the past.

JUSTIN McCARTHY, in a contribution to the December North American Review on "Parliamentary Manners," says of the British Parliament: "The House of Commons is almost the noisiest and rudest legislative assembly with which I have any manner of personal acquaintance." McCarthy must be right. When the opposition, numbering nearly one-half the total enrollment, will hoot and hiss a venerable statesman like Gladstone, as they did Thursday night, the truth of the critic's structures becomes apparent. Making every allowance for the excitement that springs from heated political discussions, the Tory members can plead no justification in heaping insult upon the head of one whom the civilized world justly holds in such high esteem.

COL. W. O. BRADLEY is just now receiving a great amount of advertising in connection with the coming state general election. If Mr. Bradley is nominated and able men put on the ticket to help him, he will be the next Governor of Kentucky. The trouble with the Republicans in Kentucky has been that they insisted upon putting "old has-beens" in front instead of giving the young, live, able and competent men a chance. Take four men, Hon. W. O. Bradley, of Lancaster, A. E. Wilson, of Louisville, Geo. Denney, of Lexington and James Breckinridge, of this city and put them at the head of the Republican ticket at the coming election, and watch the Democrats for By. When the Democrats dumped against them their old dry bones would rattle like a glass factory in an electric storm—Republican Ban-ner.

The vexed question of what to do with the World's Fair buildings in Chicago will be settled. The Exposition Directors have turned them over to the Park Commissioners together with \$200,000 in money, and so freed themselves from all future responsibility. The Park Commissioners will probably make a profit out of the bargain, as they can leave the buildings standing until times get better and the material brings a higher price. The Liberal Arts and Manufacturers Building is excepted from this trade and will probably be torn down and rebuilt elsewhere by the city. So the great White City will soon vanish and the vision that fascinated so many deserved complications will remain only an image to be called up by those who saw or read of it.

## National Capital.

[From Our Regular Correspondent.]

WASHINGTON, Dec. 19, 1893.—The divinity that doth hedge about a king is nothing to the ex-clusiveness which is now surrounding the Democratic Senate. The ancient and honorable Thomas Jefferson, the father of Democracy and its patron saint, must turn over in his grave, if he has any idea how far his political descendants have departed from his principles of the rights of the common people. Many instances to illustrate this fact could be cited. They have been gradually increasing during the last few years, but one or two of the latest exhibitions of Senatorial prerogative are deserving of notice. In the western end of the Capitol is the Senate elevator, which had hitherto been used, as a matter of course, by persons whose business called them to the upper stories of the building. All, however, the Senatorial committee that they will not ride longer in the same elevator with the common herd. Guards are now stationed at the corridors leading to the elevator, with instructions to allow no one to pass except Senators and members of the Senatorial families and newspaper correspondents. For the first time in the history of the country the free passage of the public through the Capitol is impeded by guards stationed for that purpose.

But there is another development of exclusiveness on the part of the Senate which is more serious. The Senate chamber is at 12 o'clock. Usually the Senate chamber contains the longest of the day. But, when Mr. Willis has been improvidently cast for the part and found it a trifle too—shall we say robust?—for his complexion. But, anyhow, Job still lurks in the shadow.

## Press Paragraphs.

[CROSS FROM TOMMIES.]

Guthrie now has a union choir, going to Evangelist Beville's work.

Guthrie. Videlte.

We arise to in-chir if this is to be considered Guthrie's last chance for note-erity.

An exchange says the moon was twenty-three days old when the first snow fell, and there will be twenty-three snows this winter if Luna is any good as a weather prophet.—Bath County Word.

Palmer—a man that would baffle any coachman—is nothing more nor less than a Lumbie.

Depot Agent has been afflicted with boils on his head, neck and hands for the past few weeks, and at this time is suffering greatly from the effects of a half dozen or more on his hands alone. It was great difficulty that he attends to his daily duties.—Murphy Letter.

We are no physician, but from the gentleman's disposition to "boil over," we are inclined to think that this is a genuine case of "Kings-evil."

LITERARY NOTES.

The December number of The Southern Magazine is most notable and delightful even among the issues of that popular periodical. Its Christmas tree is white, decorated with drawings of holly and mistletoe, and printed in green gold. Two interesting sketches of life in Frankfort, on the Kentucky, an illustrated article on the Mariner of San Francisco," by Janey Howe Mar. An able and scholarly presentation of "The South in American Literature" is made by John Richard Meader. The fiction is especially good, four charming stories being offered in "The Miracle at Mrs. Smiley's" by C. W. Tyler, a charming Christmas story by a new writer in a style rivaling Dickens at his best; "A Story of Shanty Boat Life," by Adelaide Dell, a rollicking story of life among the lowly; and "Corn Shuckin'" at Marse Anderson by W. K. Morris. The illustrations are excellent, being furnished by E. W. Kemble, J. H. Vanderpool, James Graham Harwood, W. J. Dodd, S. S. Bush and others.

Poetess is represented in "The Gaven—The Fisherman's Song," by Maurice Thompson, "The Kodie Bloom," by Mary McNeil Scott, and "The Bishop," by Frank L. Slator.

It is doubtless a good thing that Mr. Jess did not exist in the days of Noah, or he might have caused the patriarch a deal of trouble to find a sufficient number of specimens for his ark collections.

We are inclined to think that matrimony would reduce Gov. Peck to a smaller measure, probably a gal-un.

Ensor may always be relied upon to furnish an item of news out of the ordinary. Mr. Rice Jesse, who is a member of the Legislature yesterday which harbored six owls, two squirrels, one coon and seven woodchucks. All were killed by the fall.—Owensboro Inquirer.

It is doubtless a good thing that Mr. Jess did not exist in the days of Noah, or he might have caused the patriarch a deal of trouble to find a sufficient number of specimens for his ark collections.

J. M. May is making arrangements to burn five hundred thousand and one million brick at Natawa, next spring.—Fate of Two Cities.

We cannot forbear expressing our A-mays-ness at this seeming impossibility. How in the name of reason a man can burn five hundred thousand to one million!

It has been generally supposed that the status is as broad and indefinite in its scope as the "general welfare" clause of the Federal Constitution, but the cases to which it really applies are limited in number.

Nevertheless, in view of the fact that there seems to be much popular mis-apprehension as to the meaning of the statute, Mr. O'Neil has already submitted a case for hearing by the United States Supreme Court, upon which he hopes for early, as it will be conclusive, action.

Goss on the tariff question is at the Capitol, the points which are affecting the democracy of the House most are the income tax controversy and conflicting opinions as to how the sugar schedule shall be adjusted.

We would exhort Mr. Pasley to call him, and they also wish that he makes a full team to himself when it is time to strike.

The precautionary steps taken during the strike made so quiet here that any old woman could sit in a room at Fort Wayne and wings of its own volition eat fishy, oily, sour pickles, in which his right ear was purloined. We regret to state, however, that the club has not yet been let their supply of coal to their agents so down, that a few days' stoppage of shipments affects them in any way.

Mr. Babbage, formerly with the St. Bernard Co., as foreman of the coke works, has accepted a position, we are informed, with the Dekoven Coke Company.

While business was somewhat affected by the strike last week, our mines did not complain, but are now in a position to offer a vigorous fight, at least two or three.

It is a fortunate thing for the coal consumers that the coal operators of this state never let their supply of coal to their agents so down, that a few days' stoppage of shipments affects them in any way.

Asst. Ass't. Paymaster O'Conor, as the boys call him, and they also wish that he makes a full team to himself when it is time to strike.

Men of grit and courage are sometimes found without employment. Allow or disallow it would be well for him to go with a good revolver, and keep his eyes open, in case his experience has not already directed him to increase internal revenue.
